## Instructions specific for this grahanam

### Ahara niyama

- On the previous (Monday) night, food may be taken. On the day of grahanam (Tuesday), food is not to be taken from dawn.
- If one is not able to observe upavasa through the day, it is practical to take alpa aharam like yavagu / kanji. Even that is to be avoided in the yama before grahana (after 2 ~ 3 PM). Definitely during the grahanam nothing should be taken.
- After the moksha snanam, food may be cooked and partaken.

### Anushthanam

- Considering the short length of the grahanam, the following order may be followed.
- Before sunset, sandhya arghya pradanam. Before moonrise coming (this time) about 6 minutes after sunset, sandhya japam, upasthanam and completion of sandhyavandanam.
- Immediately after moonrise: grahana arambha snanam, grahana shradhham/tarpanam, danam. Special japam as per time available. After grahana moksha, moksha snanam. Then other anushthanas and activities.
- As per the graha punya kala available in the respective places, whatever is possible may be done. At least grahana snanam may be performed.

ବେଂ-ଏକ୍-ମାନ୍ୟ-ପରିପାଳନ-ମନ୍ତ୍ର

- The annual etc shraddha to be performed on that day for Purnima tithi should be performed on the next day.

### Correct time for anushthana

- News has come in many panchanga-s and media that the grahana starts after 3 PM. However moonrise will not even have happened at that time in Bharat. Hence grahana anushthana cannot be done at that time.
- The punya kala is only from the moonrise of the respective places upto the common grahana end at 18:47.
- In places where moonrise happens after grahana end, there is no grahana punya kala or any grahana niyama/anushthana-s mentioned above.

### Upcoming grahanas visible in Bharat

- The next Surya Grahana is two years away on Plavanga year Kataka Ashadha Amavasya (2027 August 02).
- The next Chandra Grahana is three years away on Kilaka year Mithuna Ashadha Purnima (2028 July 06).

☞ ପ୍ରେସ୍:

## General notes for all grahanas

### Jyautisha details

- A lunar eclipse happens because of the earth's shadow falling on the moon. So start and end times of Chandra Grahana will not change depending on where we see it from.
- A solar eclipse happens because of the moon's shadow falling on the earth. Due to the movement of this shadow on the surface of the earth, each place will have different start and end times of Surya Grahana.

ବୈଦ୍ୟ-ଏକ୍ଷ-ମାଧୁ-ପରିପାଳନ-ମନ୍ଦିର

- The sandhi of amavasya-prathama or purnima-prathama is known as parva.
- Globally, a solar eclipse will start before this parva in amavasya at one place and end after it in prathama at another place. But the matter of individual places is different. A grahana occurring in the morning can end within amavasya before prathama. A grahana occurring in the evening can start in prathama after amavasya.
- However since for a lunar eclipse has only one global start and end time, it will always start before the parva in purnima and end after it in prathama.
- In case of grasta udaya, grahana will start before the rise of sun or moon in our place. But it will obviously be visible only after rise.
- In case of grasta astamana, grahana will end after the set of sun or moon in our place. But it will obviously be visible only until set.
- In the case of a lunar eclipse, the penumbra of the earth (where only a part of the sun is blocked) does not cause a visible darkening of the moon and is hence not considered for anushthanam.

### Bhojana niyamas

- For four yāmams ( $\approx$ 12 hours) before the solar eclipse food should not be eaten. It is three yāmas ( $\approx$ 9 hours) for a lunar eclipse.
- Food is not to be taken in the night before surya grasta udaya and day before chandra grasta udaya.
- Food is not to be taken in the night after surya grasta astamana and day after chandra grasta astamana.

ବେଂ-ଏକ୍-ମାନ୍ୟ-ପରିପାଳନ-ମନ୍ଦିର

📞 9884655618 📲 8072613857 📲 📩 vdspsabha@gmail.com 🌐 vdspsabha.org

- Young children ( $\approx 7$  years old), elderly ( $\approx 70$  years old), and sick people need not observe this. Those who cannot observe this can adopt a light diet like milk, fruit. Even in this case, it is necessary to avoid food for at least 1 yāmam ( $\approx 3$  hours) before.
- Certainly food is not to be taken during the eclipse by anyone.
- None of these restrictions apply to the intake of mother's milk by infants. The age of the child may be taken into consideration.
- Water, food that is apakva (i.e. uncooked food items) - the sampradāya is to protect them with darbha grass. These can be used after eclipse. But food cooked before grahaṇa is not edible after the eclipse.

### Beginning of anushtana

- Before the start of the eclipse, make sure to keep ready the change of garments, the āsanas for the anushtana (ritual), and the tirthapātra. Make sure that all those who have to offer tarpana have their own sesame, darbha, tarpana books.
- Once the eclipse has begun, one should bathe with the clothes that were worn. Secure water for the grahana anushtana. Put on garments that were kept separately.

### Grahana Ashaucha

- Do not touch anything other than what is needed for the anushtanas at the time of eclipse, especially bed / mat / cloth, till the bath is complete after the eclipse. If touched, they have to be washed before reusing them. This niyama (restriction) is called grahaṇa āśaucam.

ଶ୍ଵେତ-ଶ୍ଵେତମନ୍ଦିର-ପରିପାଳନ-ମନ୍ଦିର

📞 9884655618 ➡️ 8072613857 ➡️ 📩 vdspsabha@gmail.com 🌐 vdspsabha.org

- Other āśaucas like that of the birth / death do not preclude the ability to do this eclipse-related karma. Such people have ‘śuddhi’ for the duration of the eclipse. Menstruating women too need to bathe with a separately secured water.

### Grahana Shraddham

- The ancestors are to be propitiated with shraddham / tarpaṇam during the eclipse. It is also done during the lunar eclipse that occurs at night.
- In case of Surya Grahanam, if it occurs on the same day as Amavasya Shraddha/Tarpana, there are two opinions:
  - Many texts say that the Grahana Shraddha is performed the same way as Amavasya Shraddha ie women ancestors are propitiated together with their husbands and not separately. In such case, only Grahana Shraddha is to be performed.
  - One tradition holds that the women ancestors are to be propitiated separately in Grahana Shraddha (but not in Amavasya Shraddha). In such case, Grahana Shraddha and Amavasya Shraddha should be done separately.
- Make the decision as per how you are performing the grahana shraddham.
- There is a practice of performing the grahana shraddham within Krishna Paksha i.e. before end of Amavasya tithi during a Surya Grahana or after end of Purnima tithi during a Chandra Grahana. This seems to be because Krishna Paksha is connected with the pitru-s. However it will not be possible in the case of Surya Grahana which starts in one's place after Amavasya ends (see “Jyautisha details” section before). It may also not be possible in case of eclipse happening during rise or set such that

ବୀର୍ଜ-ପଞ୍ଚ-ମାତୃ-ପରିପାଳନ-ମନ୍ତ୍ର

it is not (sufficiently) visible within Krishna Paksha. So it should be performed as possible within the time available.

- Annual shraddham that is to be performed on the day of grahana may need to be performed on the next day. Details would be in panchanga-s or our “Specific Instructions” section given earlier.

### Do-s and don't-s during the punya kala

- Avoid doing wasteful things. This is an ideal time for worship and prayer.
- If the grahana occurs during sandhya kala, sandhyavandanam is to be definitely observed even during the grahana. Arghya is to be given before rise or set of sun and japam is then to be done.
- Mantra japa at the time of eclipses is of great benefit. This is also the best time to get mantra initiation.
- Do not sleep or engage in natural impulses during the eclipse. Therefore, it is better to complete any required toileting beforehand.
- Dana-s performed during grahana punya kala-s accrue immensely more punya. Do as much dana as possible.
- In grahana punya kala, all water is equal to Ganga for snanam and anushthanam. All vedadhyayis are equal to Brahma or Vyasa to accept danam. All danam is equal to bhu danam. All places are equal to Kurukshetram. So wherever we may be, we must certainly do snanam danam japam etc.
- The stotra to ashta dik palakas praying for grahana dosha nivritti is to be read. This stotra is given later.

वैद-एक-मामृ-परिपालन-मंड

- In case of very short grahana-s, do whatever is possible: at least arambha snanam with short sankalpam and set aside something for danam. For grahana shraddha/tarpana if at least sankalpa is done within the punya kala, the rest can be completed as soon as possible even if the grahana is over.
- Eclipse should not be observed with naked eyes. You can see with the strength of the light on the garment if desired. Or (if not clear) you can see the reflection - in glass, in water or in a mirror.
- Pregnant women should not be exposed either to the moonlight or sunlight during the respective eclipse. Therefore, they should avoid looking at the sun. It is best to perform the Bhagavannāma japam or stotram etc. at that time in the interest of the pregnancy.
- After the eclipse is over, one should bathe with the garment that is worn. This mokṣa snāna is very important. If not, the impurity will continue till the next eclipse.
- Even in case of grasta astamana, moksha snana is to be done after the time of moksha as known by shastra. Only after that other smarta anushthanans such as aupasanam or shrauta anushthanans such as sayandoham may be done.

### Grahana shanti/pariharam

- The people born in the rashi/nakshatra in which grahana occurs may if possible perform shanti in the form of homa next day.
- If grahana occurs in rashis 3, 6, 10, 11 from janma rashi, it will give shubha phala. If it occurs in rashis 2, 5, 7, 9 it will give somewhat ashubha phala. If it occurs in rashis 1, 4, 8, 12 it will give more ashubha phala.

ବିଦ୍ଯୁ-ପଞ୍ଚ-ମାତୃ-ପରିପାଳନ-ମନ୍ତ୍ର

- The same when counted from the grahana rashis: rashis 11, 8, 4, 3 will get shubha phala. Rashis 12, 9, 7, 5 will get somewhat ashubha phala. Rashis 1, 10, 6, 2 will get more ashubha phala.
- The nakshatra in which grahana occurs, the preceding and succeeding nakshatras, the 10th (anujanma) and 19th (trijanma) nakshatras also receive ashubha phala.
- That is, those born in the rashi/nakshatras receiving ashubha phala will have problems due to the effect of previous karma. Therefore, they should follow the anushthanas with more zeal and do parihara.
- A simple form of parihara is given later.

### Punya kala nirnayam

- Even if one cannot see the sun or moon due to clouds etc, the punya kalam is from when the grahana begins until when it ends as determined by jyautisha shastra.
- In the case of grasta udayam, the punyakalam is only after the rise of sun or moon. In the case of grasta astamanam, the punyakalam is only until the set of sun or moon. Generally, the punya kalam is when the grahana can be visible.
- In case of grasta astamana, the sandhya japa which was started already is to be continued upto the time of moksha even after the punya kala is over.
- There is a practice of doing tarpanam in krishna paksha during grahana. But since a solar eclipse can start after amavasya is over as said earlier, and in case of grasta astamana of chandra, this is not always possible. However, since anushthana is mandatory for occurrence of grahana, one should do even if there is no krishna paksha.

ਵੰਡ-ਏਚ-ਸਾਮ੍ਰਾਜ਼-ਪਰਿਪਾਲਨ-ਮਨ

- If a solar eclipse occurs on a Sunday or a lunar eclipse on a Monday (from Monday sunset till Tuesday sunrise) then it is called a Chudamani gra-hana and the punya kalam accrues limitless benefit.
- Rise/set timings given here if any are calculated as per our tradition. Here refraction or bending of light by the air near the horizon is not considered since it is unpredictable. Modern publications calculate refraction approximately showing rise times a few minutes earlier and set times a few minutes later. For anushtana, traditional times are to be taken.

ॐ नमोऽप्यग्रहे रात्रे पूर्णे वायु-कुर्वन्त-मत्ताः।  
भस्त्रन्मृत्वे भव रामि-पंचै एवै परागं सभवतु भवेत्॥

Those born in the previously mentioned rashis/nakshatras should perform parihara. Write the above verse on a card or a palm leaf and chant least a few times before tying it on the forehead.

The grahana is of Chandra. Paddy dhanya pleases Chandra.

Thus when the eclipse is over, perform danam of the above dhanyas with this card / palm leaf and offer it on the same or next day along with tambūlam and some dakṣiṇā.

Repeat the following eight verses below as many times as possible.

## Grahan timings for various places

Above map shows the locations where the grahana is visible and not. The grahana is visible in places to the East (right) of the line. It is not visible in places to the West (left) of the line.

Google Map for more details: ([click here](#))

You can zoom into this map to identify if the grahana is visible at other places of interest not in the list below.

The timings for 450+ places of Prachina Bharat are given in the table below. For places where the eclipse is not visible (e.g. Mumbai) only the moonrise is given.
